Education

- **University of Connecticut** — Storrs, CT
  MS and PhD, Computer Engineering (Grades: 3.72) — *Aug 2011 - Aug 2017*
  - Thesis : Applied Machine Learning Algorithms to Improve Top-k Recommendations
  - My research focuses on the following
    - Algorithms to Improve prediction quality of recommendation systems.
    - Propose and Implement algorithm to addess motif search problem in bioinformatics.
    - Application of Neural Network for BigData compression.
- **West Bengal University of Technology** — India, West Bengal
  BS Computer Engineering (Grades: 4.00) — *Aug 2004 - Aug 2008*

Publications

Conferences

- 18th IEEE International Conference on High Performance Computing and Communications (HPCC 2016)
- 13th Annual Computing and Control in the Water Industry (CCWI) 2015 Conference

- 8th IAPR International Conference on Pattern Recognition in Bioinformatics, 2013
- 3rd IEEE International Conference on Computational Advances in Bio and Medical Sciences (ICCABS), 2013

Skills

Research: Data mining, machine learning, recommendation systems, algorithm and complexity, collaborative filtering, big data analytics, high performance computing, matrix factorization, bioinformatics.

Languages: C/C++, Java and worked on several other languages and technologies(PHP, Python, C-sharp, General Purpose GPU, CUDA, MPI, OpenMP, R, HTML, CSS, XML, JavaScript, .NET, Linux, Oracle).

Operating Systems: Linux.

Applications: MatLab.

Work Experience

- **Bentley Systems Inc.** Watertown, CT
  Deep Learning Research Intern *Feb 2015 - May 2015*
  - Applied deep learning to smart water networks to better predict water usage and identify abnormal events.
  - Improved prediction accuracy by 2.2 percent on previous ANN based framework there by reducing water leakage and False Alarm on Real dataset.
  - Scaled up application using GPU technology and improved runtime by several times.
- **University of Connecticut** Storrs, CT
  Graduate and Research Assistant *Aug 2011 - Dec 2016*
  - Developed machine learning algorithms to improve item recommendation.
    * Proposed and implemented algorithm to improve prediction accuracy of collaborative filtering based recommendation system.
    * Proposed new model to apply locally weighted regression in presense of auxiliary information to predict missing entries in sparsely populated datasets using matrix factorization framework.
  - Combine multiple predictive models to improve item recommendation.
    * Proposed algorithm to combine multiple kernels using Ada-Boost in to predict missing entries in sparsely populated datasets.
    * Proposed model offers better prediction accuracy than linear multiple kernel learning on many real datasets.
  - Developed and implemented algorithms for mining motifs in DNA and protein sequences.
    * Proposed and implemented algorithm to locate approximately repeated patterns in DNA and protein sequences.
    * Introduced edit distance based motif search to locate all d-neighborhood motifs.
  - Developed and implemented algorithm for lossless compression of FASTQ files for big biological data.
    * Proposed lossless compression algorithm for FASTQ files.
    * Achieved higher compression ratio than all well known algorithms by applying neural network based prediction.
- **University Information Technology Services** University of Connecticut, Storrs, CT
  Software Engineer *Aug 2015 -*
  - Software Developer in the UConns Facilities Asset Management Information System (FAMIS) support team.
  - implementing Oracle technology in FAMIS, developing university-wide Visual Map implementation, developing maintenance management and capital project management utilities.
- **Cognizant Technology Solutions** India, Chennai
  Software Engineer *Jan 2009 - Jun 2011*

- Coded extensively using .Net Framework 3.5.
- Developed and maintained webpages.
- Wrote SQL queries, stored procedures, cursors and triggers as a part of backend development.
- Worked on ASP.Net based reporting system.
- Migrated code bases from C++ to C-sharp.
- Extensively worked on databases.
- Worked on ANT scripts and Install Shield for build delivery.
- Implemented and practiced scrum in all the projects.

- **Indian Statistical Institute** India, West Bengal
  Undergraduate Research Intership *Jan 2008 - Aug 2008*
  - Partial image encryption for secured multimedia communications.

Awards and Achievements

- Competitive Pre-doctoral fellowship
- ICCABS 2013 Travel Award
- Reviewer of IEEE Transactions on Big Data Conference
- Associate of the Month Award, Cognizant Technology Solution
